My friend told me i could buy something i've been looking for in a store nearby. Problem is, the picture he gave me didn't tell me where this is. Flag format is "Koneko" followed up by coordinates of the location this picture is taken. Example:Koneko{XX,XXX_XX,XXX} (3 digits behind commas)

First I download the sign34.png

Looks normal right? But its actually the key for our Flag as written in the description of the case.

After that I went to google to scan the area and signs for clues. What I get is “下関長門線 下関市楠乃” the destination and the “Promise” is on route 34. So now lets go to google maps.

and there we go, we got the place and the coordinates.

google.com/maps/@33.9975766,130.9526759,3a,18.2y,136.29h,9...

Koneko{33,997_130,952}
